

June 17, 2015

Dear Customer,

Maintex began implementing GHS regulations in mid 2013 to enable Maintex to comply with GHS requirements by June 1st 2015. In May 2015, we emailed and/or sent letters in mail to all Maintex customers indicating our transition to new GHS compliant labels and Safety Data Sheets beginning June 1st, as well as included Safety Data Sheets for purchased products. Please note products such as Cosmetics (Body Wash), Disinfectants, Antibacterial, and Hand Sanitizers are exempt from GHS requirements, but will still include an updated Safety Data Sheet.

Maintex may continue to distribute products manufactured and labeled prior to June 1st, 2015 with a HCS 2012-compliant labels and MSDS (If SDS is not available) through December 1, 2015, due to our “due diligence” and “good faith”, which we have demonstrated in accordance with the OSHA’s Relaxed Enforcement Policy. More information regarding this OHSA policy may be found at the following site:

https://www.osha.gov/dep/enforcement/hcs_guide_052015.html

All Maintex and Private label products manufactured on or after June 1st 2015 contain GHS compliant labels and SDS. Maintex product SDS are available for download at <http://www.maintexregulatory.com/> For Private Label SDS, please contact regulatory@maintex.com.

Thank you for your cooperation and support.
