

**Keep yourself safe,
clean, and in order
with ASPEN AIR™ Mask System**

MIKOMA Aspen Air™ extend the life
of standard N95 Filter masks up to 6x longer
using our unique replaceable filters.

Comfortable.
Durable.
Sustainable.

MIKOMO

Creating
Excellence

The first reusable mask that uses refillable filters

A safer and more sustainable alternative to single use mask. It starts with an extremely comfortable thermoplastic elastomer frame that creates a tight seal and carries a refillable filter created from N95 filter material. The fabric used to create six Aspen Air Filters is equivalent to one typical N95 mask. Miakomo helps more people stay safe by using the valuable N95 fabric effectively.

Washable · Adjustable · Refillable
