#### 4. FIRST AID MEASURES

##### First aid measures:

- Eye:** Immediately flush eyes with a direct stream of water for at least 15 minutes while forcibly holding eyelids apart to ensure complete irrigation of all eye and lid tissue. Get prompt medical attention if irritation develops.
- Skin:** Flush skin with water and wash with mild soap and water. Seek medical attention if irritation develops or rash occurs. Remove contaminated clothing and wash before reuse.
- Inhalation:** No first aid should be needed.
- Oral:** No first aid should be needed. Seek medical attention if large quantities are consumed. Do not induce vomiting except by physician's order. If spontaneous vomiting is inevitable, prevent aspiration by keeping victim's head below the knees.

**Most important symptoms/effects:** May cause minor irritation.

**Notes to physician:** Treat according to person's condition and specifics of exposure.

#### 5. FIRE FIGHTING MEASURES

- Suitable extinguishing media:** Dry chemical, carbon dioxide, and foam.
- Unsuitable extinguishing media:** None known.
- Specific firefighting measures:** Use water spray to cool containers exposed to flames. If leak or spill has not ignited, use water spray to disperse the vapors.
- Specific hazards during firefighting:** None known.
- Special protective equipment and precautions for firefighters:** Do not enter enclosed or confined workspaces without proper protective equipment. Firefighting personnel should wear respiratory protection (positive pressure if available).
